About The NCS™

The National Community Survey™ (The NCS™) report is about the "livability" of Wilsonville. A livable community is a place that is not simply habitable, but that is desirable. It is not only where people do live, but where they want to live. The survey was developed by the experts from National Research Center at Polco.

Great communities are partnerships of the government, private sector, community-based organizations and residents, all geographically connected. The NCS captures residents' opinions considering ten central facets of a community:

- Economy
- Mobility
- Community Design
- Utilities
- Safety
- Natural Environment
- Parks and Recreation
- Health and Wellness
- Education, Arts, and Culture
- Inclusivity and Engagement

The report provides the opinions of a representative sample of 412 residents of the City of Wilsonville collected from April 13, 2022 to June 1, 2022. The margin of error around any reported percentage is 5% for all respondents and the response rate for the 2022 survey was 16%. Survey results were weighted so that the demographic profile of respondents was representative of the demographic profile of adults in Wilsonville.

How the results are reported

For the most part, the percentages presented in the following tabs represent the "percent positive." Most commonly, the percent positive is the combination of the top two most positive response options (i.e., excellent/good, very safe/somewhat safe, etc.). On many of the questions in the survey respondents may answer "don't know." The proportion of respondents giving this reply is shown in the full set of responses included in the tab "Complete data." However, these responses have been removed from the analyses presented in most of the tabs. In other words, the tables and graphs display the responses from respondents who had an opinion about a specific item.

Comparisons to benchmarks

NRC's database of comparative resident opinion is comprised of resident perspectives gathered in surveys from over 600 communities whose residents evaluated the same kinds of topics on The National Community Survey. The comparison evaluations are from the most recent survey completed in each community in the last five years. NRC adds the latest results quickly upon survey completion, keeping the benchmark data fresh and relevant. The communities in the database represent a wide geographic and population range. In each tab, Wilsonville's results are noted as being "higher" than the benchmark, "lower" than the benchmark, or "similar" to the benchmark, meaning that the average rating given by Wilsonville residents is statistically similar to or different (greater or lesser) than the benchmark. Being rated as "higher" or "lower" than the benchmark means that Wilsonville's average rating for a particular item was more than 10 points different than the benchmark. If a rating was "much higher" or "much lower," then Wilsonville's average rating was more than 20 points different when compared to the benchmark.

The survey was administered during the COVID-19 pandemic, a time of challenge for many local governments. While we provide comparisons to national benchmarks, it is important to note that much of the benchmark data was collected prior to the pandemic. This may impact how your City's 2022 ratings compare to other communities' ratings from the past five years.

Trends over time

Trend data for Wilsonville represent important comparison data and should be examined for improvements or declines*. Deviations from stable trends over time represent opportunities for understanding how local policies, programs, or public information may have affected residents' opinions. Changes between survey years have been noted with an arrow and the percent difference. If the difference is greater than 7 percentage points between the 2020 and 2022 surveys, the change is statistically significant.

* In 2020, The NCS survey was updated to include new and refreshed items. Consequently, some of the trends may be impacted due to wording modifications that could have potentially altered the meaning of the item for the respondent.

Methods

Selecting survey recipients

All households within the City of Wilsonville were eligible to participate in the survey. A list of all households within the zip codes serving Wilsonville was purchased from Go-Dog Direct based on updated listings from the United States Postal Service. Since some of the zip codes that serve the City of Wilsonville households may also serve addresses that lie outside of the community, the exact geographic location of each housing unit was compared to community boundaries using the most current municipal boundary file. Addresses located outside of the City of Wilsonville boundaries were removed from the list of potential households to survey. Each address identified as being within city boundaries was further identified as being within the City of Wilsonville. From that list, addresses were randomly selected as survey recipients, with multi-family housing units (defined as those with a unit number) sampled at a rate of 5:3 compared to single family housing units.

An individual within each household was selected using the birthday method. The birthday method selects a person within the household by asking the "person whose birthday has most recently passed" to complete the questionnaire. The underlying assumption in this method is that day of birth has no relationship to the way people respond to surveys. This instruction was contained in the introduction of the survey.

Conducting the survey

The 2,800 randomly selected households received mailings beginning on April 13, 2022, and the survey remained open for seven weeks. The first mailing was a postcard inviting the household to participate in the survey. The next mailing contained a cover letter with instructions, the survey questionnaire, and a postage-paid return envelope. All mailings included a web link to give residents the opportunity to respond to the survey online. All follow-up mailings asked those who had not completed the survey to do so and those who had already done so to refrain from completing the survey again.

About 5% of the 2,800 mailed invitations or surveys were returned because the household address was vacant or the postal service was unable to deliver the survey as addressed. Of the remaining 2,656 households that received the invitations to participate, 412 completed the survey, providing an overall response rate of 16%. The response rate was calculated using AAPOR's response rate #2* for mailed surveys of unnamed persons.

It is customary to describe the precision of estimates made from surveys by a "level of confidence" and accompanying "confidence interval" (or margin of error). A traditional level of confidence, and the one used here, is 95%. The 95% confidence interval can be any size and quantifies the sampling error or imprecision of the survey results because some residents' opinions are relied on to estimate all residents' opinions. The margin of error for the City of Wilsonville survey is no greater than plus or minus 5 percentage points around any given percent reported for all respondents (412 completed surveys).

In addition to the randomly selected "probability sample" of households, a link to an online open participation survey was publicized by the City of Wilsonville. The open participation survey was identical to the probability sample survey with a question about where they heard about the survey. The open participation survey was open to all city residents and became available on May 18, 2022. The survey remained open for 2 weeks.

Analyzing the data

Responses from mailed surveys were entered into an electronic dataset using a "key and verify" method, where all responses are entered twice and compared to each other. Any discrepancies were resolved in comparison to the original survey form. Range checks as well as other forms of quality control were also performed. Responses from surveys completed on Polco were downloaded and merged with the mailed survey responses.

The demographics of the survey respondents were compared to those found in the 2010 Census and 2019 American Community Survey estimates for adults in the City of Wilsonville. The primary objective of weighting survey data is to make the survey respondents reflective of the larger population of the community. The characteristics used for weighting were age, Hispanic origin, housing type, race, and sex. No adjustments were made for design effects. Weights were calculated using an iterative, multiplicative raking model known as the ANES Weighting Algorithm.* The results of the weighting scheme for the probability sample are presented in the following table.

NRC aligns demographic labels with those used by the U.S. Census for reporting purposes, when possible. Some categories (e.g., age, race/Hispanic origin, housing type, and length of residency) are combined into smaller subgroups.

| | | Unweighted | Weighted | Target* |
|-----------------|--------------------------------------|------------|----------|---------|
| Age | 18-34 | 9% | 33% | 34% |
| | 35-54 | 23% | 34% | 34% |
| | 55+ | 68% | 33% | 32% |
| Hispanic origin | No, not Spanish, Hispanic, or Latino | 94% | 89% | 89% |
| | Spanish, Hispanic, or Latino | 6% | 11% | 11% |
| Housing tenure | Own | 76% | 45% | 45% |
| | Rent | 24% | 55% | 55% |
| Housing type | Attached | 39% | 61% | 61% |
| | Detached | 61% | 39% | 39% |
| Race & Hispanic | Not white alone | 19% | 22% | 22% |
| origin | White alone, not Hispanic or Latino | 81% | 78% | 78% |
| Sex | Female | 55% | 57% | 57% |
| | Male | 45% | 43% | 43% |
| Sex/age | Female 18-34 | 5% | 19% | 19% |
| | Female 35-54 | 14% | 19% | 19% |
| | Female 55+ | 36% | 19% | 19% |
| | Male 18-34 | 4% | 14% | 14% |
| | Male 35-54 | 10% | 15% | 15% |
| | Male 55+ | 31% | 14% | 14% |

The survey datasets were analyzed using all or some of a combination of the Statistical Package for the Social Sciences (SPSS), R, Python and Tableau. For the most part, the percentages presented in the reports represent the "percent positive." The percent positive is the combination of the top two most positive response options (i.e., excellent/good, very safe/somewhat safe, essential/very important, etc.), or, in the case of resident behaviors/participation, the percent positive represents the proportion of respondents indicating "yes" or participating in an activity at least once a month.

On many of the questions in the survey respondents may answer "don't know." The proportion of respondents giving this reply is shown in the full set of responses included in the tab "Complete data". However, these responses have been removed from the analyses presented in the reports. In other words, the tables and graphs display the responses from respondents who had an opinion about a specific item.

Highlights

Ratings for mobility are strong in Wilsonville.

Most ratings for mobility in Wilsonville were higher than the national benchmarks, indicating that this area is a strength for the community. About 7 in 10 residents gave positive reviews of the overall quality of the transportation system and ease of travel by bicycle, both of which were higher than the national average, as well as the ease of travel by public transportation (scoring much higher than the benchmarks). About three-quarters of respondents offered favorable ratings to the ease of public parking, ease of travel by car, and ease of walking. A similar proportion gave higher-than-average marks to sidewalk maintenance and bus or transit services, and at least 8 in 10 were pleased with the City's street cleaning and street lighting services. In a question unique to Wilsonville, residents were asked to write—in their own words—what they believed to be the biggest priorities facing the City of Wilsonville over the next five years; the top priority identified by this question (with 26% of the total responses) was traffic and infrastructure.

Economy is an important area of focus for the City.

While the overall economic health was rated favorably by three-quarters of residents, almost all survey items related to the economy decreased from the previous survey in 2020. Fewer than two-thirds of residents rated Wilsonville an excellent or good place to work, down from 81% in 2020. Residents also offered slightly less favorable evaluations this year for the city's employment opportunities (46% excellent or good), shopping opportunities (44%), and the vibrancy of Wilsonville's downtown/commercial area (38%). About half of residents gave positive ratings to the City's economic development and variety of business and service establishments, and three-quarters were pleased with the overall quality of business and service establishments. Cost of living is an area of concern for many residents, with just one-quarter offering positive assessments for this survey item; this rating decreased 11% since the previous survey, but remained on par with the national comparison group. When asked what impact the economy would likely have on their family income in the next 6 months, only 17% of respondents expected a positive impact, while 39% anticipated a negative impact.

Health and wellness may be an area of opportunity for the City.

Overall health and wellness opportunities in Wilsonville received favorable ratings from 7 in 10 residents; however, this and most other survey items within this facet declined since the City's previous survey in 2020. About 6 in 10 residents offered positive reviews of Wilsonville's health services, the availability of affordable quality food, and the community taking care of vulnerable residents, all of which decreased by about 10% from the previous survey. About half of residents positively rated the availability of affordable quality health services and availability of preventive health services, on par with benchmark comparison communities. Only 3 in 10 residents offered positive reviews of the availability of affordable quality mental health care, lower than the national average.

Although residents' perceptions of community design in Wilsonville are generally favorable, results indicate that additional focus on this area may be needed.

About three-quarters of residents gave favorable ratings to the overall design or layout of residential and commercial areas in Wilsonville, on par with comparison communities nationwide. About 9 in 10 respondents were pleased with their neighborhood as a place to live and to raise children. The City's overall appearance was rated positively by85% of survey participants, which was higher than national comparison groups. Code enforcement services also received higher-than-average reviews from about 6 in 10. A similar proportion gave positive ratings to public places where people want to spend time, well-designed neighborhoods, and the preservation of the historical or cultural character of the community, holding steady with previous survey results and remaining on par with national benchmarks.

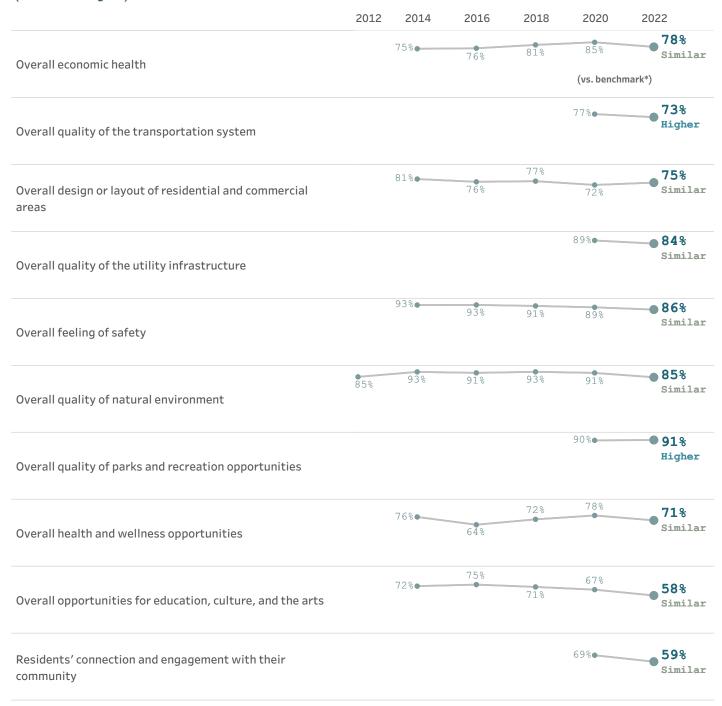

Despite generally positive results within this facet, a few items declined since the previous survey iteration, suggesting an opportunity for renewed focus in those areas. Ratings for well-planned residential growth (53%), well-planned commercial growth (44%), the overall quality of new development (52%), and land use, planning and zoning services all decreased slightly from 2020. Additionally, residents' evaluations of the variety of housing options saw a substantial decline, dropping from 61% excellent or good in 2020 to 40% this year. The availability of affordable quality housing also fell by nearly 15%, with only 2 in 10 residents offering positive ratings. In a custom question unique to Wilsonville, residents were asked to write in their own response regarding the biggest priorities facing the City of Wilsonville over the next five years. Affordable housing/cost of living was identified as a top concern for 27% of survey respondents, with growth/development following closely behind (with 22% of comments pertaining to those topics).

Facets of livability

Resident perceptions of quality and importance for each of the facets of community livability provide an overview of community strengths and challenges that are useful for planning, budgeting and performance evaluation.

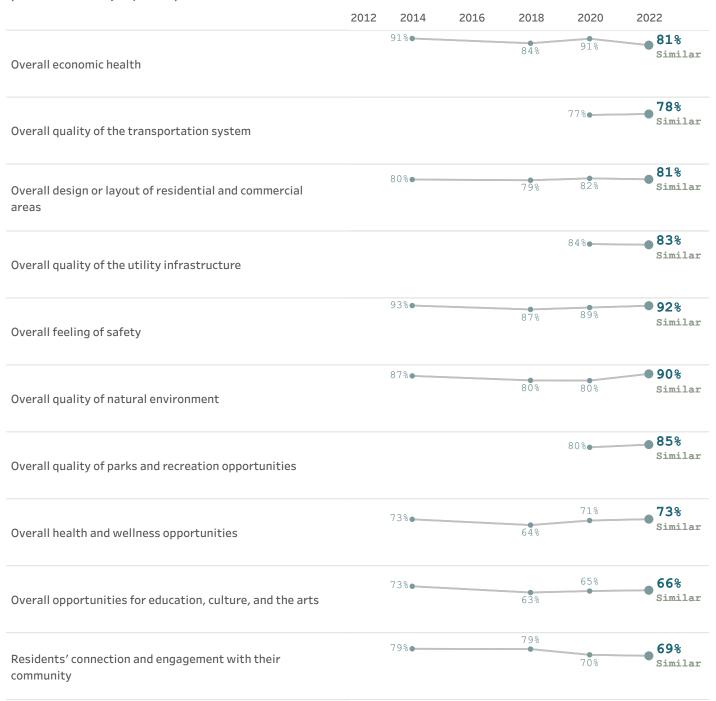

The charts below show the proportion of residents who rated the community facets positively for quality and the priority (importance) placed on each. Also displayed is whether local ratings were lower, similar, or higher than communities across the country (the national benchmark).

Please rate each of the following characteristics as they relate to Wilsonville as a whole. (% excellent or good)

Please rate how important, if at all, you think it is for the Wilsonville community to focus on each of the following in the coming two years.

(% essential or very important)

^{*} Comparison to the national benchmark is shown. If no comparison is available, this is left blank.

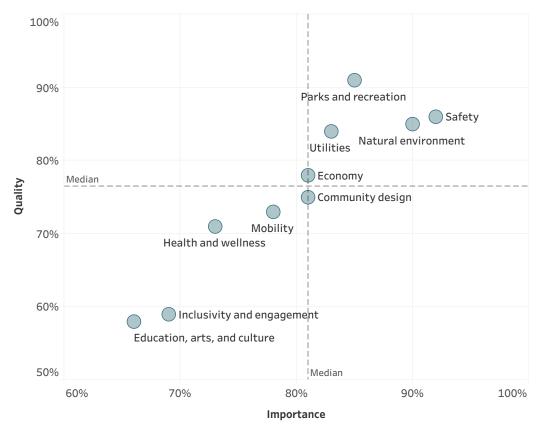

Balancing performance and importance

Every jurisdiction must balance limited resources while meeting resident needs and striving to optimize community livability. To this end, it is helpful to know what aspects of the community are most important to residents and which they perceive as being of higher or lower quality. It is especially helpful to know when a facet of livability is considered of high importance but rated as lower quality, as this should be a top priority to address.

To help guide City staff and officials with decisions on future resource allocation, resident ratings of the importance of services were compared to their ratings of the quality of these services. To identify the services perceived by residents to have relatively lower quality at the same time as relatively higher importance, all services were ranked from highest perceived quality to lowest perceived quality and from highest perceived importance to lowest perceived importance. Some services were in the top half of both lists (higher quality and higher importance); some were in the top half of one list but the bottom half of the other (higher quality and lower importance or lower quality and higher importance); and some services were in the bottom half of both lists.

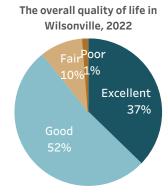

Services receiving quality ratings of excellent or good by 77% or more of respondents were considered of "higher quality" and those with ratings lower than 77% were considered to be of "lower quality." Services were classified as "more important" if they were rated as essential or very important by 81% or more of respondents. Services were rated as "less important" if they received a rating of less than 81%. This classification uses the median ratings for quality and importance to divide the services in half.

The quadrants in the figure below show which community facets were given higher or lower importance ratings (right-left) and which had higher or lower quality ratings (up-down). Facets of livability falling closer to a diagonal line from the lower left to the upper right are those where performance ratings are more commensurate with resident priorities. Facets scoring closest to the lower right hand corner of the matrix (higher in importance and lower in quality) are those that may warrant further investigation to see if changes to their delivery are necessary to improve their performance. This is the key part of this chart on which to focus. Facets falling in the top left hand corner of the chart (lower in importance but higher in quality) are areas where performance may outscore resident priorities, and may be a consideration for lower resource allocation.

Quality of life

Measuring community livability starts with assessing the quality of life of those who live there, and ensuring that the community is attractive, accessible, and welcoming to all.

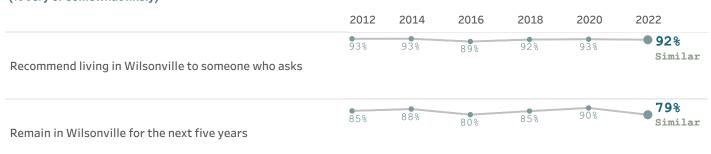

Please rate each of the following aspects of quality of life in Wilsonville. (% excellent or good)

| | 2012 | 2014 | 2016 | 2018 | 2020 | 2022 |

Custom questions

Below are the results of each custom question on the survey. The percentage of positive responses (major/minor source or very/somewhat likely or improved alot/improved slightly) is shown.

| Speak to official at City Hall | 459 | 30 |
|---|-----|----|
| Attend a meeting at City Hall | 38% | |
| Comment on City's social media site (Facebook, Twitter, Nextdoor, Instagram, other) | 24% | |
| During the last 12 months, would you say your opinion of Wilsonville has: | 33% | |

Open-ended questions

Wilsonville included one open-ended question on their survey. The verbatim responses were categorized by topic area and those topics are reported below with the percent of responses given in each category. Because some comments from residents covered more than a single topic, those verbatim responses are grouped by the first topic listed in each comment.

What do you think are the biggest priorities facing the City of Wilsonville over the next five years?

| Traffic/Infrastructure | 26% | | |
|---|-----|--|--|

| Other | 3% | | |
| Nothing | 2% | | |
| Healthcare | 2% | | |

National benchmark tables

This table contains the comparisons of Wilsonville's results to those from other communities. The first column shows the comparison of Wilsonville's rating to the benchmark. Wilsonville's results are noted as being "higher", "lower" or "similar" to the benchmark, meaning that the average rating given by Wilsonville residents is statistically similar to or different than the benchmark. The second column is Wilsonville's "percent positive." Most commonly, the percent positive is the combination of the top two most positive response options (i.e., excellent/good). The third column is the rank assigned to Wilsonville's rating among communities where a similar question was asked. The fourth column is the number of communities that asked a similar question. The fifth column shows the percentile for Wilsonville's result -- that is what percent of surveyed communities had a lower rating than Wilsonville.

Complete set of frequencies

This dashboard contains a complete set of responses to each question on the survey. By default, "Don't know" responses are excluded, but may be added to the table using the response filter to the right. When a table for a question that only permitted a single response does not total to exactly 100%, it is due to the common practice of percentages being rounded to the nearest whole number.

Full trends

This table contains the trends over time for the City of Wilsonville. The combined "percent positive" responses for each survey year are presented (e.g., excellent/good or yes). If an item was not included during an administration of the survey, no percentage will be shown in the table. If the difference between the 2020 and 2022 surveys is greater than seven percentage points, the change is statistically significant.

It is important to note that in 2020, The NCS survey was updated to include new and refreshed items. Consequently, some of the trends may be impacted due to wording modifications that could have potentially altered the meaning of the item for the respondent.

Methods (open participation)

As part of its participation in The National Community Survey™ (The NCS™), the City of Wilsonville conducted a survey of 2,800 residents. Survey invitations were mailed to randomly selected households and data were collected from April 13, 2022 to June 1, 2022. The results from this main survey effort represent the most robust estimate of your residents' opinions.

After the above data collection period was underway, a link to an online open participation survey was publicized by the City of Wilsonville. The open participation survey was identical to the probability sample survey with a question about where they heard about the survey. The open participation survey was open to all city residents and became available on May 18. The survey remained open for two weeks and there were 117 responses.

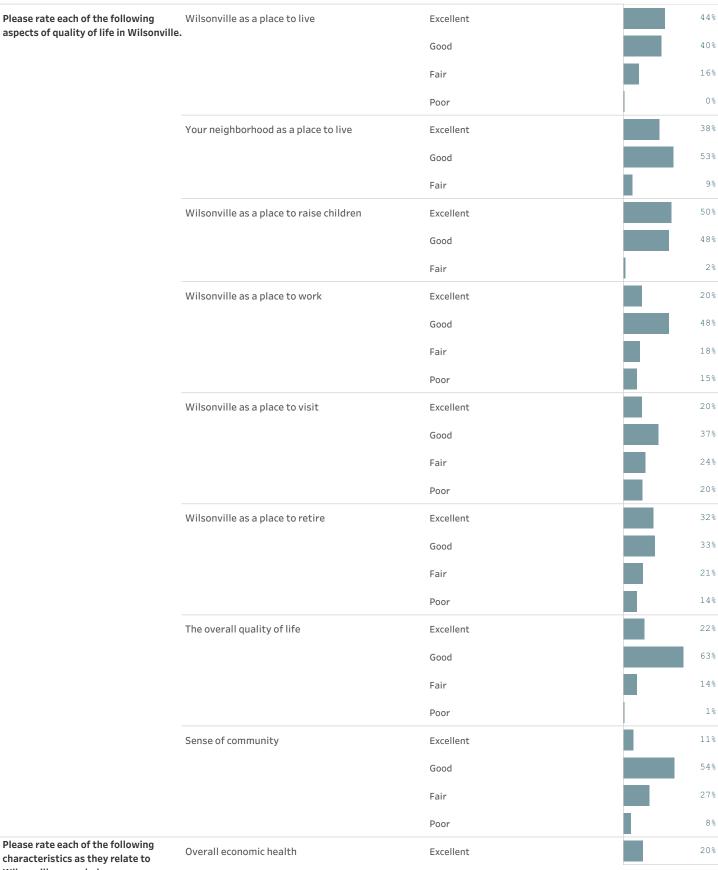

The open participation survey data were not collected through a random sample and it is unknown who in the community was aware of the survey; therefore, a level of confidence in the representativeness of the sample cannot be estimated. However, to reduce bias where possible, these data were statistically weighted to match the demographic characteristics of the 2010 Census and 2019 American Community Survey estimates for adults in the City of Wilsonville. The characteristics used for weighting were age, sex, race, Hispanic origin, housing type, housing tenure, and area. No adjustments were made for design effects. Weights were calculated using an iterative, multiplicative raking model known as the ANES Weighting Algorithm.* The results of the weighting scheme for the open participation survey are presented in the following table.

* Pasek, J. (2010). ANES Weighting Algorithm. Retrieved from https://web.stanford.edu/group/iriss/cgi-bin/anesrake/resources/RakingDescription.pdf

| | | Unweighted | Weighted | Target* |
|-----------------|---|------------|----------|---------|
| Age | 18-34 | 13% | 34% | 34% |
| | 35-54 | 44% | 34% | 34% |
| | 55+ | 43% | 32% | 32% |
| Hispanic origin | No, not Spanish, Hispanic, or Latino | 97% | 89% | 89% |
| | Yes, I consider myself to be Spanish, Hispa | 3% | 11% | 11% |
| Housing tenure | Own | 85% | 46% | 45% |
| | Rent | 15% | 54% | 55% |
| Housing type | Attached | 25% | 61% | 61% |
| | Detached | 75% | 39% | 39% |
| Race & Hispanic | Not white alone | 16% | 22% | 22% |
| origin | White alone, not Hispanic or Latino | 84% | 78% | 78% |
| Sex | Female | 64% | 57% | 57% |
| | Male | 36% | 43% | 43% |
| Sex/age | Female 18-34 | 9% | 19% | 19% |
| | Female 35-54 | 33% | 19% | 19% |
| | Female 55+ | 22% | 19% | 19% |
| | Male 18-34 | 3% | 14% | 14% |
| | Male 35-54 | 12% | 15% | 15% |
| | Male 55+ | 21% | 14% | 14% |

Open participation survey results

This dashboard contains a complete set of responses to each question on the open participation survey. By default, "don't know" responses are excluded, but may be added to the table using the response filter to the right. When a table for a question that only permitted a single response does not total to exactly 100%, it is due to the common practice of percentages being rounded to the nearest whole number.

April 2022

Dear City of Wilsonville Resident:

Please help us shape the future of Wilsonville! You have been selected at random to participate in the 2022 Wilsonville Community Survey. **If you've already completed the survey online, thank you. Please do not respond twice.**

Please take a few minutes to fill out the enclosed survey. Your participation in this survey is very important—especially since your household is one of only a small number being surveyed. Your feedback will help Wilsonville make decisions that affect our City.

A few things to remember:

- Your responses are confidential and no identifying information will be shared.
- In order to hear from a diverse group of residents, the adult 18 years or older in your household who most recently had a birthday should complete this survey.
- You may return the survey by mail in the enclosed postage-paid envelope, or you can complete the survey online at:

https://polco.us/xxplaceholder

Please do not share your survey link. This survey is for randomly selected households only. The City will conduct a separate survey that is open to all residents just a few weeks from now.

If you have any questions about the survey, please call 503-570-1503.

Thank you for your time and participation!

Sincerely,

Julie Fitzgerald

Mayor

Please complete this survey if you are the adult (age 18 or older) in the household who most recently had a birthday (the year of birth does not matter). Your responses are confidential and no identifying information will be shared.
