SUMMARY OF PROPOSAL

In 2012, the City adopted the Stormwater Master Plan, which provided an update to the previous master plan adopted in June 2001. There have been changes in land use and new stormwater management requirements that need to be addressed as part of this update to the Stormwater Master Plan. The City ultimately seeks an integrated approach to stormwater and watershed management that will result in the development of management solutions and policies that maintain, restore and enhance local watersheds and meet engineering, environmental and land use needs.

The Stormwater Master Plan identifies capital projects and programs to increase system capacity, address infrastructure and maintenance needs, add or enhance water quality treatment, alleviate natural system deficiencies, and proactively plan for future growth.
